Major predictors of an individual's ability to read both alphabetic and non-alphabetic scripts are oral language skills, phonological awareness, rapid automatized naming and verbal IQ. As a leisure activity, children and adults read because it is pleasant and interesting. Children become better readers when they know more about the world in general, and when they perceive reading as fun rather than another chore to be performed. In the academic field, some view literacy in a more philosophical manner and propose the concept of "multiliteracies". In order to

understand a text, it is usually necessary to understand the spoken language associated with that text. In this way, writing systems are distinguished from many other symbolic communication systems. Once established, writing systems on the whole change more slowly than their spoken counterparts, and often preserve features and expressions which are no longer current in the spoken language. The great benefit of writing systems is their ability to maintain a persistent record of information expressed in a language, which can be retrieved independently of the initial act of formulation.

Reading for pleasure has been linked to increased cognitive progress in vocabulary and mathematics during adolescence. Sustained high volume lifetime reading has been associated with high levels of academic attainment. Reading has also been shown to improve stress management, memory, focus, writing skills, and imagination. The cognitive benefits of reading continue into mid-life and the senior years. Reading books and writing are among brain-stimulating activities shown to slow down cognitive decline in seniors. Learning to read or reading skills acquisition is

La lecture peut être définie comme une activité psychosensorielle qui vise à donner un sens à des signes graphiques recueillis par la vision et qui implique à la fois des traitements perceptifs et cognitifs. L'efficacité de la lecture dépend de deux voies de traitement de l'information, qui coexistent et se complètent mutuellement: l'identification

Lesen im engeren Sinn bedeutet, schriftlich niedergelegte, sprachlich formulierte Gedanken aufzunehmen. Das Lesen eines Textes ist ein durch Übung und Kenntnisse des Lesers bestimmter heuristischer, kognitiver Vorgang. Im weiteren Sinn versteht man darunter die Rekonstruktion der im Text kodierten Bedeutungsinhalte und den Aufbau einer mentalen

Olvasáson az írott nyelv által hordozott nyelvi jelentés megalkotásának képességét értjük. Két alapja van: a nyelvi megértés és a dekódolás. Az ember mindig is a körülötte lévő jelrendszernek értelmezéséből szerezte információit, ezek egyike a nyelv volt. Erre a jelrendszerre épült másodlagos formaként az írás. Az olvasás nemcsak

Læsning er en legemlig færdighed på linje med andre legemlige færdigheder som at cykle og at stå på rulleskøjter. Læsning udføres enten med øjnene eller med fingerspidserne. Selve det at læse er den karakteristiske automatiske skanning af skrift, som den læsendes øjne i reglen foretager: En ubevidst handling som udelukkende hører under menne-
